

WHAT DOES TRADE MEAN FOR DAIRY?

MORE MARKETS

95% of the world's population lives outside the U.S. and the global dairy market is worth almost \$414 billion.

MORE SALES

In 2017, the U.S. exported \$5.4 billion worth of dairy. The U.S. exports so much dairy that one day's production leaves the country.

MORE JOBS

For every \$1 billion of dairy exported, 20,000 U.S. jobs are created. Every state exports dairy, which means they all benefit from the job creation.
